Advertisers who do not remit their papers, or who have not made payment in advance, will charge the balance by deducting same from their next bill.

TONOPAH IS SHOOTING

WALL news took second place with the Bonanza yesterday owing to shooting development in the local industries that are of far more importance to the people of Tonopah than any action that may be taken by the Kaiser. The sentiment obtains that the country is able to take care of itself and that the Imperial German government has no more concern now to risk any stay here on coming off with their horses. This paper was filled with facts about the development of new mineral industries that mean millions of dollars for the prospectors and miners of Southern Nevada. In the first place it was officially announced that Tonopah had become the principal center for a section as large as some two or three eastern states. Through the efforts of our Tonopah men this city has become the purchasing market where thousands of tons of the new mineral will find its way to the outer world. The shipping, carrying, mapping and handling all call for the employment of labor and the dinner bucket brigade will be multiplied at a rate capable of opening the eyes of those who have not followed the startling development of this single industry. The production of tonopah becomes a stupendous proposition for the expert company to look after at the value of concentrates is very much in excess of the value of the average tonnage shipment. When it comes to taking care of mineral worth from \$1.00 to \$4.00 a pound the amount runs into big money with an apparently diminutive showing. The banks will profit, the railroads will come in for a goodly share and a short time will find the tide of travel turn in this direction with greater volume than at any time during the early boom of Tonopah.

There was an account of the first shipment of quicksilver from Silver City to Mississauga where many Tonopah people are deeply interested. This is another high priced mineral selling now at the present reduced prices of \$1.75 a pound and, since the cost of production is infinitely cheaper than the production of any other class of ore it stands to reason that dividends will not be left to the remote future.

That's why Tonopah rejoices. Everything comes to the fellow that waits. Tonopah is the money as deep as she can be without being choked with gold.

BEATING AROUND THE BUSH

THERE is a problem in high finance that will tax the ingenuity of the average man to solve. Some time ago the Pacific Mail Steamship company announced the sale of its boats and a suspension of transpacific service. Everybody thought the company was going out of business and the management went on record with the statement that the American flag was being driven off the seas through discrimination in favor of others by which crews of American citizens had to be paid for more than what is paid to sailors and coolies. So far so good. Now for the explanation of the coming back of the same old boats still under the American flag. The boats were sold to the International Steamship company. Subsequently it was decided to acquire the stock of the steamship company which carried with it the remaining assets of lighters, wharves, etc. Then the Southern Pacific Railroad company, which owned a big block of stock, sold its holdings which gave the International Steamship company not alone the boats but the title of the selling company therefore requiring the purchaser to go to the formality of reselling the title. There are other ways of killing a fowl than by shooting it to death.

POLICY OF PREPAREDNESS

THE army bill, like most other legislation of importance, will be pitted in the committee of conference. The house measure, sponsored by Mr. Hay and declared by him to be the president's bill, differs in many essentials from the senate bill, sponsored by Senator Chamberlain and undoubtedly we shall hear that this, too, is the president's bill. And surely when the measure is finally whipped into shape and has been passed by both branches of congress, we shall be told that it is then the president's bill and that Mr. Wilson has won a great triumph. In those days Mr. Wilson counts everything as fish that comes to his net.

BIDS FOR MUZZLES

THE BONANZA cannot be muzzled, but the county commissioners insist that Nig's family of seven young pups be choked off so it is necessary for the editor of this paper to advertise for a wholesale supply.

A veteran jurymen, who had his first experience with the new voters on the panel remarked last night that the three ladies impressed in the cause of justice acted like perfect gentlemen.

A boy, who wanted a free ride, threw a block signal at Cobre and stopped a limited train. His wish was gratified for he was given a free ride to the reform school at Elko.

With the development of the tungsten industry in and around Tonopah it behoves the Wells Fargo company to work overtime to take care of the business.

SHEEPMAN SUFFERING LOSS
OF MANY OLD EWES

Senator A. W. Keddie returned last week from a trip to the shearing camps of the Williams estate herds around Beowawe. Mr. Keddie says the sheep men are just now beginning to feel the effects of the severe winter. Many of the old ewes who came through are so weak that they have succumbed in large numbers and as a consequence the loss will be much greater than was at first anticipated. The wool clip is proving lighter than ordinary, but, probably owing to the wet snows the fleeces are much cleaner than usual. Fallon Standard.

SUIT FOR SETTLEMENT
OF THE DUNPHY ESTATE

A complaint has been filed in the district court at Elko by Violin Carrie Carmen Piercy Burnett vs. Jennie C. Dunphy et al., asking for a partition and sale of the personal property of the Wm. Dunphy estate near Beowawe, Eureka county. The plaintiff is a granddaughter of Wm. Dunphy, who died in the nineties and whose estate was valued at the time of his death at nearly \$2,000,000.

JAPAN ASPIRES TO RECOGNITION AS ONE OF THE GREAT NATIONS

By Associated Press

TOKIO, April 22.—President Mikio Kanno of Keio University declares that Japan has now entered a new era and that the time has come for the country to assume leadership of the world and to aspire to independence in politics, commercial marketing and general sea and land power.

Dr. Kanno in the Japan Magazine says: "Reckoned as a nation the empire enters on a new career of unshaken hope and ambition. Japan's goal is now the most important and most significant possible to a people."

"Up to the present Japan has been kept in the leading strings of European thought and civilization, living almost at the feet of German science, sending her young men abroad to acquire scientific knowledge before they were taught it to lead their countrymen. The state of affairs must now change. Japan should cease to wait at western shrines. For Japan is a nation of new inventions and discoveries in drawing. Up to the present we have seen all the busy adopting and adapting and imitating European civilization until imitation has grown to be a habit with us, but our world of thought and science is not now so poor that we have nothing to advise and stimulate at home."

"In my opinion the Japanese are as capable of thought and invention as any other people. Germany, whom we have been worshipping so far in this respect, was not the originator of those things for which we admired her, but herself an imitator of England, America, France and Italy where most of the great inventions and discoveries took place. It is, indeed, a great mistake to regard Germany as a great inventive nation."

"While up to the present Japanese commerce and industry have been under the domination of the west, Japan should now make a change and exert herself for world-wide recognition. The best time to do this is the present, while Europe is engaged otherwise and the greatest commercial

war is too long to continue on. At present England and France are too much taken up with the war to take much interest in competition, while Germany, which has made the poverty stricken and her unwilling customers, is now surrounded and cut off from maintaining her commerce abroad. The whole trade field of the Orient is open to Japanese commerce and if she does not seize the opportunity it will be her own fault. We have the means of chance for unusual development."
